

Dependencies and npm modules

You need to install the following npm modules: bootstrap: "^2.0.0", react: "^19.2.0", react-dom: "^19.2.0", react-router-dom: "^7.9.4", react-scripts: "5.0.1", web-vitals: "^2.1.4",

```
react-router-dom
```

Available Scripts

In the project directory, you can run:

npm start

Runs the app in the development mode.\

The page will reload when you make changes.
You may also see any lint errors in the console.

npm test

Launches the test runner in the interactive watch mode.\

npm run build

Builds the app for production to the **build** folder.
It correctly bundles React in production mode and optimizes the build for the best performance.

The build is minified and the filenames include the hashes.
Your app is ready to be deployed!
